

Using Recyclables To Build A Train And Rail Car

How to make a train engine?

- **Step 1** - Choose a box and tape off any open ends.
- **Step 2** - Cut a toilet paper roll into two.
 - Use one half of the tube as the steam pipe.
 - Use the other half of the toilet paper roll as the roof of the engine.
- **Step 3** - Paint the box in your favourite colour and let it dry.
- **Step 4** - Then paint four wheels black and let them dry.
- **Step 5** - Once the box has dried. Don't forget to draw the windows and doors.
- **Step 6** - Once the second coat of paint is dried, use glue to put on the wheels.

How to make a railcar?

- **Step 1** - Choose a box and paint it in your favorite colour.
- **Step 2** - Then paint four wheels black and let them dry.
- **Step 3** - Once the first coat of paint is dry, paint a second coat on the box. Don't forget to draw in the windows and doors.
- **Step 4** - Stick four black wheels on either corners of the box and now your railcar is ready.

Connect the Engine and the railcar one behind the other by taping the string on the bottom of the boxes to complete building your train.

How to make the rail tracks?

- **Step 1** - Place two popsicle sticks parallel to each.
- **Step 2** - Apply glue to both.
- **Step 3** - Now place other popsicle sticks horizontally across the two sticks and let the glue dry.
- **Step 4** - Turn over the popsicle stick structure and now you have created the train tracks.
